

UNIVERSITY of MARYLAND MEDICAL CENTER

FACTS

The University of Maryland Medical Center (UMMC) provides a full range of health care services, coordinated across its downtown and midtown Baltimore hospital campuses and several community locations. As the flagship of the University of Maryland Medical System, UMMC serves as a referral center for the most critically ill and injured patients in the Mid-Atlantic region. UMMC was established in 1823 in partnership with the first public medical school in the nation. Since that time, UMMC has trained generations of physicians, nurses and other health professionals as an international leader in patient care, research and education.

MAJOR CENTERS AND SERVICES

The R Adams Cowley Shock Trauma Center is the world leader in trauma care, research and training, one of the highest volume trauma centers in the US, and the heart of Maryland's model emergency medical services system.

The University of Maryland Children's Hospital is a regional resource for diagnosing and treating infants through young adults, and is ranked among the top 50 centers in the nation for pediatric cardiology and cardiac surgery by *U.S. News & World Report*.

The University of Maryland Marlene and Stewart Greenebaum Comprehensive Cancer Center (UMGCCC) is one of some 50 NCI-designated comprehensive cancer centers and ranked among the top 50 cancer centers in the nation by *U.S. News & World Report*.

The University of Maryland Division of Transplantation is one of the nation's most active transplant programs—performing more than 400 organ transplants a year. The Scientific Registry of Transplant Recipients has recognized UMMC for above-average outcomes for adults undergoing living-donor transplant.

The University of Maryland Heart and Vascular Center is a national leader in minimally invasive treatment options.

The world-class **University of Maryland Center for Diabetes and Endocrinology** is recognized by the National Committee for Quality Assurance, and is based at UMMC's midtown campus.

The **University of Maryland ALS Center** is the only Treatment Center of Excellence in Maryland certified by the ALS Association, and is based at UMMC's midtown campus.

The new **University of Maryland Center for Pulmonary Health**, based at the midtown campus, offers comprehensive care for a range of disorders, including asthma, interstitial lung diseases, COPD, bronchitis and lung cancer.

A REGIONAL CENTER FOR SPECIALTY AND CRITICAL CARE

UMMC is a leader in **time-sensitive critical care**, with referrals coordinated by **Maryland ExpressCare**. **Nearly one-third of all beds at UMMC are dedicated to critical care**, also called intensive care, in 11 specialized units dedicated to subspecialties such as neurotrauma, cardiac surgery, cardiac care and neurological critical care. In the last two years, UMMC opened three innovative units: the **Critical Care Resuscitation Unit**, the **Lung Rescue Unit** and the **Thoracic Intermediate Care Unit**, the first of its kind in the region dedicated to thoracic surgery patients.

In response to the COVID-19 pandemic, UMMC expanded its **Biocontainment Unit** to care for COVID-19 patients in the region who need ECMO and other highly specialized care.

The Level IV **Drs. Rouben and Violet Jiji Neonatal Intensive Care Unit (NICU)** at the University of Maryland Children's Hospital provides the highest level of care to babies born prematurely or with complications. Neonatology faculty at the University of Maryland School of Medicine have discovered that lighting and sound levels matter for tiny infants, so the new 52-bed NICU emulates the environment in a mother's womb.

The Beacon Award for Excellence — the most prestigious national recognition for critical care — has been awarded to three UMMC units, most recently to the Multi-Trauma Intermediate Care 6 Unit.

The Joint Commission recognizes UMMC as a **Comprehensive Stroke Center**, a designation awarded to 113 centers in the US.

UMMC is among the less than 10 percent of US hospitals with **Magnet Designation for nursing excellence**, as recognized by the American Nurses Credentialing Center.

Both campuses of UMMC provide **comprehensive inpatient and outpatient services in behavioral health**, for children, adolescents and adults.

DEDICATED TO COMMUNITY HEALTH IMPROVEMENT

UMMC's downtown and midtown campuses together provide more than \$250 million a year in services that benefit our community.

During the beginning of the COVID-19 pandemic, the UMMC Community Health team organized staff volunteers to distribute 20,872 food boxes and meals to children and families in West Baltimore. The teams also distributed 3,200 COVID Care Kits, including washable cloth face masks, bottles of hand sanitizer and an educational handout on the importance of wearing masks, washing hands and social distancing.

UMMC takes services to where residents live, work and go to school. The **Breathmobile** provides primary care and education to children with asthma at their schools. The **Bridge Program** serves victims of intimate-partner violence long after they leave the hospital. The **Maryland Healthy Men Program** reduces hypertension risk for African-American men with incentives such as gym memberships and healthy-cooking classes. And the **UMMC Midtown Health Center** primary care practice helps residents manage and improve their health.

As one of Baltimore's largest employers, UMMC provides **workforce development programs for adults and teens**. In 2019, more than 450 West Baltimore residents were hired by UMMC and nearly 80 students from nearby city schools participated in internships.
